

GANESH SUBEDI

FRONTEND DEVELOPER

Parbat -Kushma, Nepal | +977 9840924217 | subediganesh306@gmail.com

ABOUT ME

Motivated B.Sc. CSIT graduate with nearly a year of hands-on experience in frontend development using MVC .NET. Skilled in HTML, CSS, JavaScript, jQuery, AJAX, Bootstrap, and C#, I specialize in creating visually stunning, user-friendly interfaces that enhance satisfaction and engagement. A dedicated and self-motivated professional, I excel in collaborative environments, solving complex design challenges with innovative solutions. Committed to delivering high-quality results, I stay updated with the latest frontend trends to optimize performance and enhance user experiences.

PROJECTS

InSchoolERP: Contributed to the development of a web application for school management using MVC in .NET, enhancing administrative efficiency for educational institutions.

ExpoExpress: Assisted in creating a delivery package shipping and tracking web application, optimizing logistics and providing users with real-time updates.

HospitalPlus: Worked on a doctor appointment and patient registration web application in ASP.NET, streamlining scheduling and patient management.

TradePlus: Worked in developing POS software for billing and sales report generation, improving transaction management and sales insights for businesses.

HamroCareer:-An online job portal site: It is a project developed as a final year project using core PHP. The project was designed and developed by me and my two friends, where I was responsible for designing the UI and also contributed to backend development.
